PRODUCT DESCRIPTION

The Decedent Transfer Carrier with Absorbent Pad is a ruggedized, human remains pouch designed to offer improved protection to the service provider while providing dignity to the deceased. The carrier is constructed to retain bodily fluids with the combination of an integrated, absorbent pad and Aqua-Seal thread at all stitched seams. This construction minimizes the likelihood of leaking hazardous body fluids, greatly reducing the risk to service providers and the general public. Its six reinforced, integrated carrying handles enable ease of transport.
