

## ITCLAMP® TRAINING PRODUCTS

From: \$625.00

SKU: N/A

### PRODUCT DESCRIPTION

The iTClamp® by Innovative Trauma Care® represents the latest advance in battlefield hemorrhage control – the leading cause of preventable combat death. For self-aid or buddy-aid, it is an intuitive, easy to apply, combat-ready wound closure device that controls severe bleeding within seconds of application during "care under fire".

Virtually painless, the iTClamp® seals the wound, creating localized, hands-free pressure that quickly forms a stable clot and prevents further blood loss. Localized pressure remains the simplest, time-tested way to control severe hemorrhage. Application of the iTClamp® is intuitive and with minimal training every warfighter can instantly treat life-threatening hemorrhage not amenable to a tourniquet.

No comparable product exists for "care under fire" or any situations where a tourniquet is not applicable. The iTClamp® is easy-to-use and can be applied in seconds with a one-handed squeeze application.
